The reason we are the number one Car Topper on the market is twofold. One, we build the toughest tinny on the market, and two, we build the driest, safest, best handling vessel in the sub 80kg weight division. Welded in seats supported by side ribs, making the seats a structural part of the boat, its stop hull twist, it also means no rivets to leak. All fore decks and rear corners are fully welded it's clearly stronger than our stitch welded competitors.

Note: Our Topper tracker package can also be supplied with a outboard and alternative trailer, contact us to find out more.
